

Selenium Assignment E1

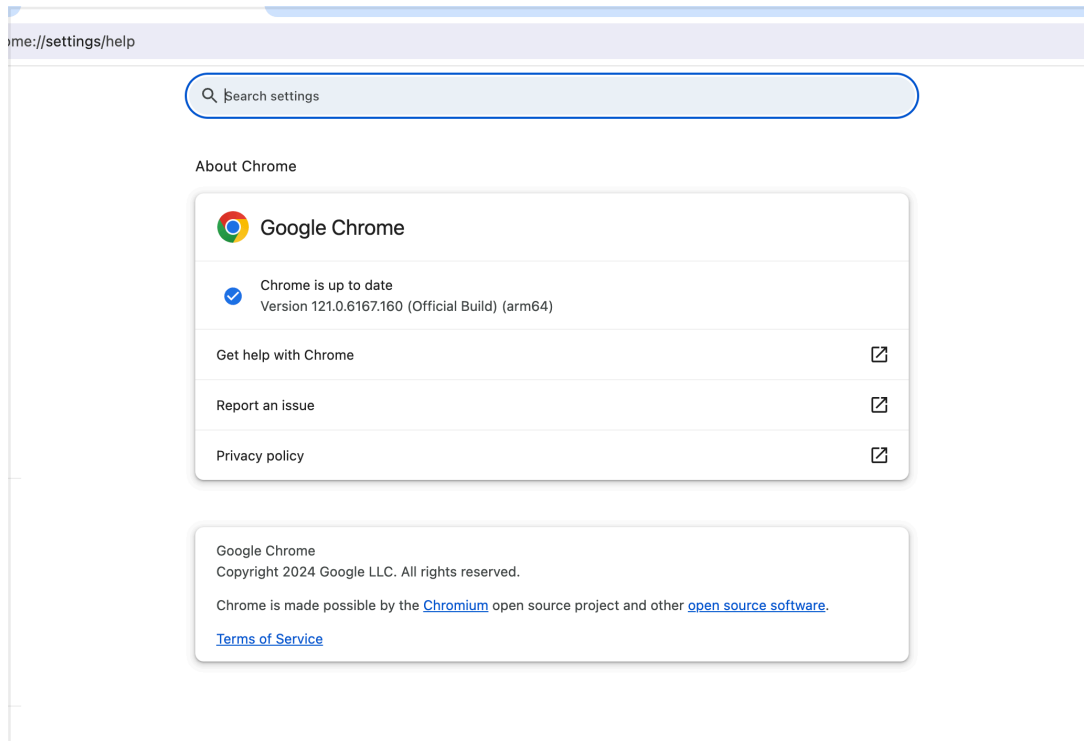

1. Create an AWS EC2 Instance.

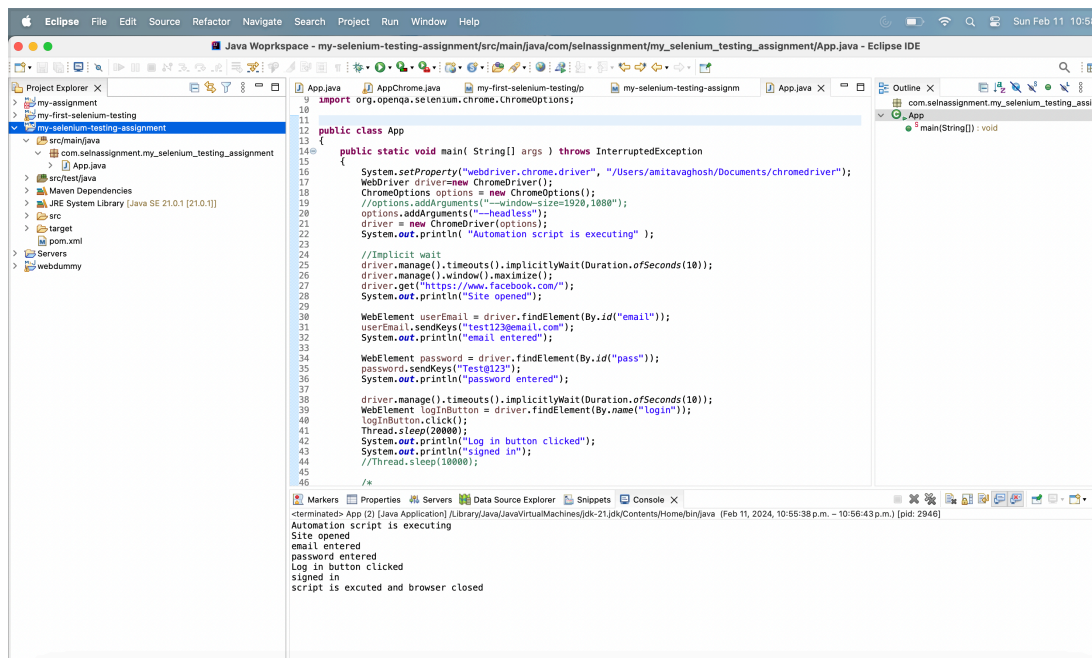

Installed Jenkins on the EC2 instance

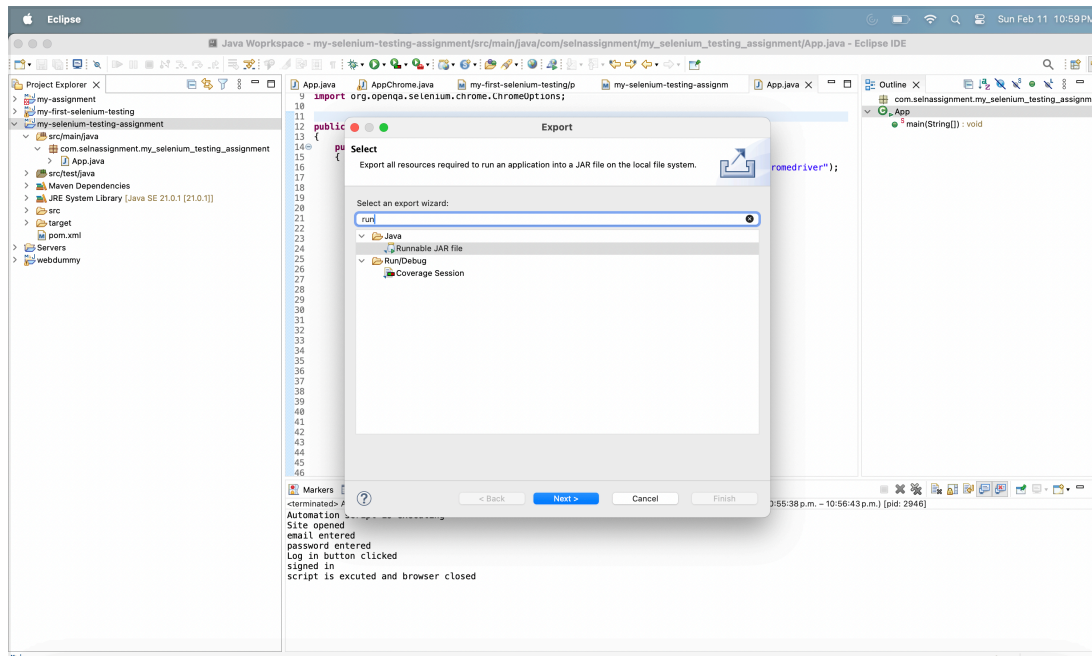

2. Check the version of the browser and download the appropriate chrome driver.

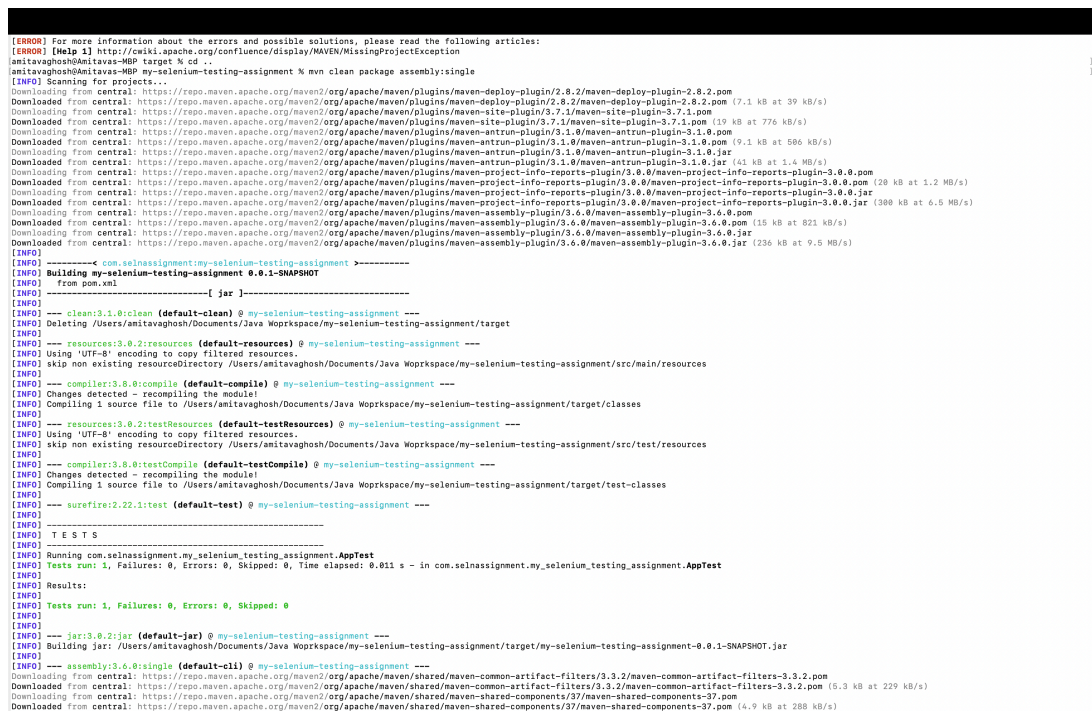

3. Write a Test automation application to automate the Facebook.com Login flow using Selenium.

4. Export your test automation application as runnable jar.

Also the Webdriver manager along with the manifest plugin has been added in pom.xml to build the runnable jar

The manifest dependency jar has been run in terminal

```

```

5. Push that runnable jar to GitHub repository. Jar is created through Jenkins scripts and manifest plugin.

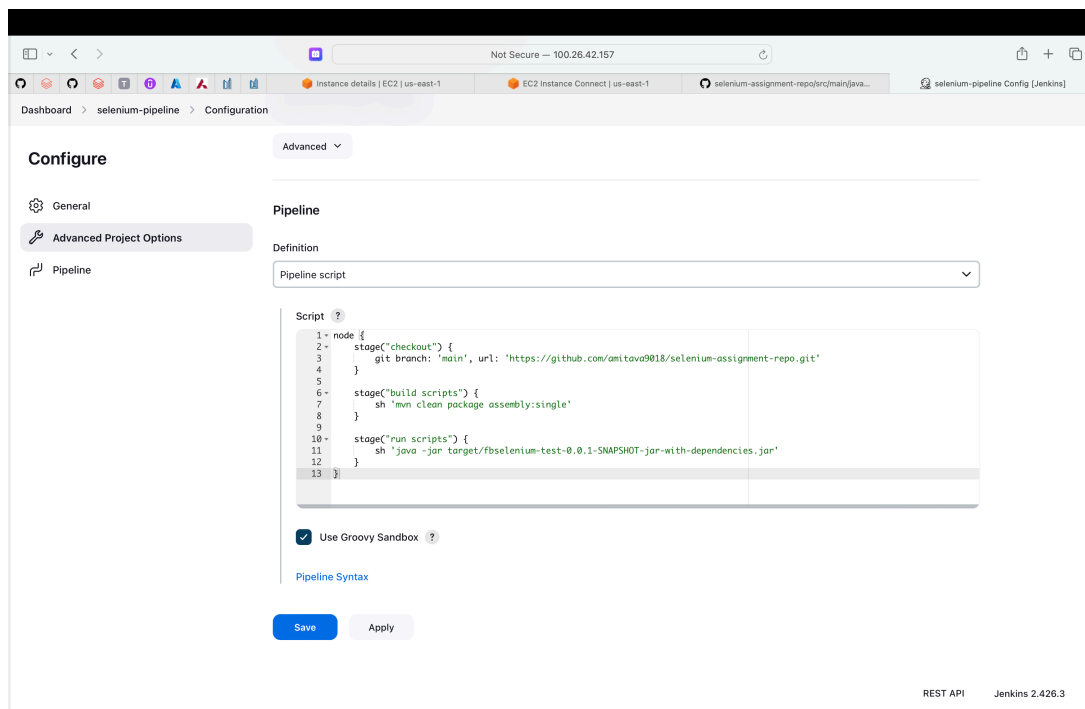

```

AmItavaghosh@AmItavas-MBP my-selenium-testing-assignment % git remote add origin https://github.com/AmItava9018/selenium-test-repo.git
AmItavaghosh@AmItavas-MBP my-selenium-testing-assignment % git push origin main
